Chicago, IL | P: +1 4479027504 | bnirajpatil9@gmail.com | [Linkedin](#) | [Github](#) | [Portfolio](#)

Education

University of Illinois at Urbana-Champaign (UIUC), Champaign, IL Aug 2025
Master's: Technology Management GPA: 3.93/4.0
Relevant Coursework: Data Science, Big Data Infrastructure, Data Storytelling, Technology Strategy

University of Mumbai – Mumbai, India Jul 2022
Bachelor's: Mechanical Engineering GPA: 3.7/4.0
Coursework: Operations Research, Numerical Methods, Probability & Statistics, Systems Engineering

Skills

Languages & Infrastructure: Python, SQL, TypeScript/JavaScript, AWS Cloud Architecture, Serverless Infrastructure, REST APIs.
Code Evaluation & QA: Unit Testing (PyTest), CI/CD (GitHub Actions), QA Automation, Technical Assessment Design, Rubric Development.
AI & Data Workflows: GenAI / LLMs, Data Annotation Pipelines, Explainable AI, Data Quality Auditing, ETL Automation.
Program & Operations: Technical Feasibility Analysis, End-to-End Scoping, Process Automation, Stakeholder Management.
Certifications: IBM AI Product Manager, Agile

Experience

Technical Product Manager & Founder - Zeno (getzeno.io), Chicago, IL Jul 2025 – Present

- Built an AI-powered fintech platform from 0 to 1 using Python, PostgreSQL, and AWS, establishing the QA workflows needed to achieve 90%+ data extraction accuracy.
- Managed 5 development sprints by defining technical requirements and evaluation rubrics, ensuring high-quality deployments for 200+ beta users.
- Architected a serverless backend using AWS Lambda and REST APIs to process 10K+ monthly transactions, smoothly connecting engineering tasks with product goals.

Product Manager- Saayam, Remote, San Francisco, USA Oct 2025 – Present

- Built full MVP help request taxonomy across 15+ service categories (housing, healthcare, finance, legal) with detailed use case specs, user flows, and safety guardrails adopted directly by engineering as the build foundation.
- Led end-to-end product requirements for volunteer geolocation feature, defining GeoSpatial API integration specs to enable real-time volunteer-to-request matching across disaster relief zones.

Strategy Consultant – Founder Institute (Internship Practicum) May 2025 – Aug 2025

- Created technical evaluation models to assess 25+ institutional partnerships, validating the feasibility of a \$5M+ revenue pipeline.
- Delivered implementation roadmaps for 3 pilot programs, scoping the exact API strategies and data workflows needed to hit a strict 60-day launch deadline.

Technology Consultant – FACES Consulting, UIUC, Champaign, IL Aug 2024 – Jul 2025

- Led technical discovery with 20+ stakeholders, turning ambiguous business requirements into actionable system architectures for 2 AI startups.
- Designed the Go-To-Market strategy and operational tracking frameworks that drove a 15% user adoption rate within a 90-day pilot trial.

Projects

Personalized Recommended Sys-LLM | AI/ML Product | [Live Demo](#) 2025

- Boosted pilot engagement by 20% by shipping recommendation engine with LLM-powered onboarding and explainable AI.

AlphaForge ML Stock Predictor | Quantitative Research | [GitHub](#) 2025

- Built ML model predicting next-day stock prices with <5% error rate using Random Forest & XGBoost on 2 years of data.

AWS-Powered Airbnb Insights Platform | Data Engineering | [GitHub](#) 2025

- Reduced manual analysis time by 80% by automating data pipeline for 10K+ listings using AWS Lambda, Glue, Athena & Tableau.

Federated Healthcare Recommendation System | Python, Scikit-learn, Streamlit | [GitHub](#) 2025

- Built privacy-preserving ML system achieving 80%+ accuracy on 1,025 patient records with explainable AI for compliance requirements.
